Also currently posted on Indeed NL/BE (dates less reliable, several look like evergreen listings): NTT DATA Business Solutions and Capgemini Sogeti each have 5+ open SAP roles in Den Bosch and Diegem respectively; see the findings markdown for the full list.

3. Live vacancies seen on Eursap (SAP-only recruiter feed)

Eursap's BE and NL pages currently surface the same central feed — filter by location once you register/apply.

Role	Job ID	Location	Type	Rate / Salary
SAP S/4HANA Finance Consultant	35123	France, remote	Contract	Market rates
SAP BTP Techno-Functional Consultant	35124	France, remote	Contract	Market rates
SAP Project Manager / Trainer	34811	Remote	Permanent	€80,000–€156,000 gross/yr + equity

Note: these three listings show a **start date** (5 Oct 2026 / 1 Sep 2026), not a posting date, and none is BE/NL-located specifically — call the local office directly to ask what is currently open.

4. Recruitment partners / agencies — contacts

Agency	Specialism	Belgium contact	Netherlands contact

Email: info@eursap.eu / cvs@eursap.eu. Not yet confirmed with a direct phone number this pass: Hays Belgium, GS-IT Recruitment, YER branch numbers, Yacht, USG Professionals / Impellam, Randstad Professionals SAP desk.

5. On job-posting dates

- LinkedIn is the most reliable signal: an exact “posted X hours/minutes/days ago” per listing — the tables above are built directly from it.
- Indeed also shows a posted date, but several listings (e.g. large NTT DATA batches) showed a flat “Posted: 6 August 2026” for every result, which looks more like a default freshness label than a true post date — treat Indeed dates as indicative, LinkedIn’s as more trustworthy.
- Specialist recruiter sites (Eursap) show a contract/permanent start date or an internal Job ID, not the date the ad went live — don’t read those as posting dates.
- Glassdoor and Jobat blocked automated fetching this pass (HTTP 403 / fetch failure) — browse those two directly in a browser.
- StepStone shows a “geplaatst op” (posted on) date but its listing pages timed out on automated fetch (JS-rendered / bot-resistant) — check manually in a browser.
